

FOLDABLE CRATE AND CONTAINERS

In **Gestión de Compras** we have a wide range of boxes, containers and other types of products for transport and storage. As they are folding pieces, the advantages that they facilitate in terms of transport, cost and space are very wide. In our catalog we have more than 120 different sizes. To get the product you want, contact Gestión de Compras, and we will help you meet your needs.

1. Large foldable container(Serie D)

	Dim.	Weigth	Load capacity	Volume
	Length: 1200mm Width: 1000mm Height: 100mm	48kg	Static load 3T / Dynamic load 1T	860L
		52kg	Static load 3T / Dynamic load 1T	860L
	Length 1200mm Width: 1000mm Height: 860mm	44kg	Static load 3T / Dynamic load 1T	700L
		48kg	Static load 3T / Dynamic load 1T	700L
	Length: 1200mm Width: 1000mm Height: 760mm	41kg	Static load 3T / Dynamic load 1T	610L
		45kg	Static load 3T / Dynamic load 1T	610L

This folding container maintains width and length in all its models, but the height varies depending on the client's needs. When folded, the height of the container is only 350mm, which facilitates its storage and transport. Manufactured through injection of plastic with High Density Polyethylene, which ensures its solidity and consistency.

It is suitable for use as product packaging containers in large-scale fisheries, printing and bleaching plants, electroplating factories, cigarette factories, food factories, leather factories, etc. Compared with the wooden and metal box, the plastic collapsible container has a long service life and is lighter, which will save you shipping cost.

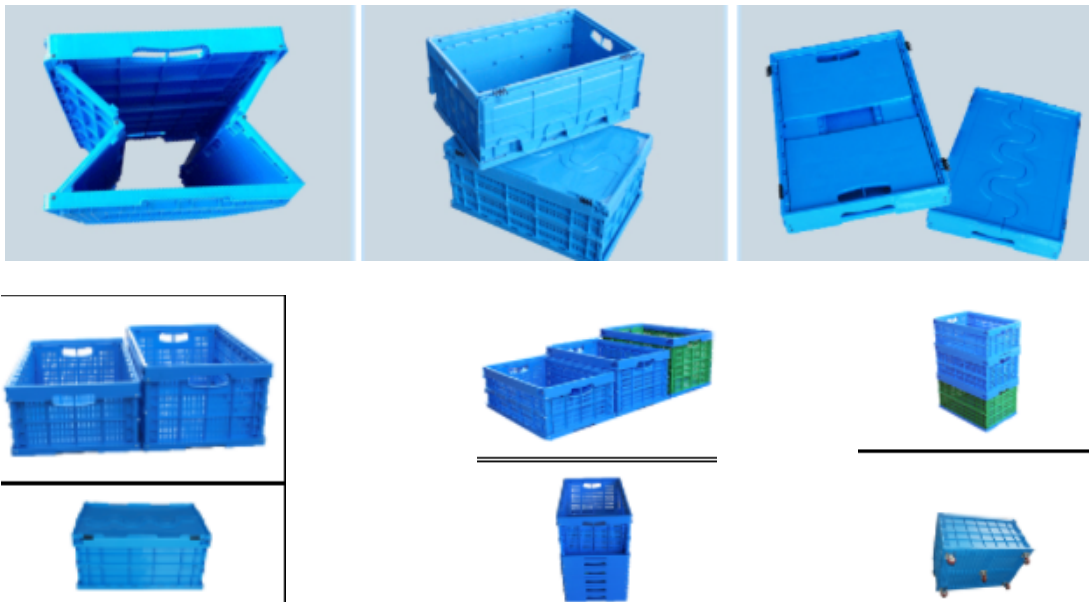

2. Collapsible crate (Serie C)

We have a wide range of folding boxes that combine the advantage of saving transportation costs, easy installation and easy to handle, it is in great demand in the world market. Especially in sectors such as industry, agriculture, fishing, animal husbandry and aquaculture. It is non-toxic and tasteless, can be used for food preservation, and is easy to clean.

Made with PP (Polypropylene), a product with light weight and long useful life.

In our catalog you can find more than 10 different boxes. With or without holes in the side walls, with or without cover, with or without wheels... Depending on the customer's needs. When folded, the boxes occupy between a third or a fifth of their original volume.

3. Collapsible container (45L)

Dim.: 540 * 370 * 260 mm

Collapsed Height: 5mm

Loading Weight: 25kg

Product Weight: 1,03kg

Volume Capacity: 45L

This collapsible container is popular for its durable capacity, space savings, and transportation and replacement cost savings. Can be used for home, office or warehouse organization. Color: blue, green and red.
